3. TECHNICAL SPECIFICATION

Specification	Description	Unity	Price
Dak.D.GAR03.007x	Supply and installation of Product for outdoor use that allows you to define and model lines and dividing arches between different external areas. The profiles are very easy to install and disassemble and withstand the most various weather conditions and physical tractions. The installation is quick and easy and it does not require any particular or specific tool. The profiles are connected to each other thanks to their joint shaped in the structure, then they are positioned according to the preferred layout and fixed to the ground using the plastic provided plastic spikes. It is an excellent alternative to heavier and less aesthetically pleasing concrete edges. Effective lenght of the kit: 3 meter, complete with 12 plastic spikes. It is available in two different heights: 45 mm and 60 mm, both in black.. Made of PP (polypropylene). Used to delineate areas of separation between different external areas. Ideal solution to circumscribe the edges of the flowerbeds, to isolate the grassy area from intrusive gravel or to define protective areas around trees and bushes.
